

Rang E Renju - E-Commerce Platform Demo

Slide 1: Welcome & The Current Journey

From Instagram to Scaling Your Business

Welcome, Rang E Renju Team! We're excited to show you the new custom e-commerce platform we've built.

The Challenge: Currently, your beautiful handpicked Indian sarees and ethnic wear are discovered on Instagram. But managing sales through Instagram DMs involves:

- **✗ Manual Work:** Typing out product codes, sharing UPI numbers, manually tracking stock.
- **✗ Lack of Accountability:** Messages get lost, orders are hard to track.
- **✗ Limited Analytics & Notifications:** Hard to know which products drive the most traffic.

The Solution: A streamlined, automated web store that connects seamlessly with your Instagram presence, reducing your manual workload while preserving the personal touch.

Slide 2: The New Customer Journey (Homepage)

Designed for Discovery

We've built the homepage to immediately capture the essence of your brand: *Colours That Tell Stories*.

Homepage Screenshot

*[!TIP] **Mobile First:** Since your customers find you on Instagram, the site is heavily optimized for a beautiful, fast mobile experience.*

Key Features:

- **Hero Section:** Instantly showcases your new collection.
 - **How It Works Flow:** Educates the customer on the simple 5-step process (Discover → Find Code → Shop → Pay UPI → Track).
 - **Direct Code Search:** A dedicated input field for customers to type the product code they saw on your latest reel.
-

Slide 3: The Shop & Product Code Lookup

Bridging Instagram and the Web

Shop Page Screenshot

Category Filters: Customers can easily filter by "Sarees" or "Kurtis".

Product Code Search:

- **Fast & Forgiving:** If a customer typos a code or uses lowercase, the search is intelligent enough to find the right item.

- **Inventory Sync:** The shop reflects real-time stock. No more "Is this still available?" DMs for items that have already sold out!
-

Slide 4: Checkout & Secure UPI Payment

Frictionless Purchasing

The checkout process is designed for speed and trust.

- **No Account Required:** Customers don't need to create an account, reducing abandoned carts.
- **Direct UPI Integration:** The payment flow highlights the UPI option clearly.
- **Trust Signals:** We emphasize secure payments, Pan-India shipping, and WhatsApp support right on the checkout page to reassure first-time buyers.

*[!IMPORTANT] **Objection Handling:** If customers are hesitant, they receive instant WhatsApp confirmations, providing a familiar trust layer.*

Slide 5: Automated Tracking & WhatsApp Support

Reducing Support DMs

Track Page Screenshot

Order Tracking Page: Customers can visit the `/track` page to see exactly where their order is.

WhatsApp Integration:

- For manual fulfillment, tracking updates can be sent via WhatsApp.
 - If a customer has a question, a click-to-chat WhatsApp link pre-fills a message with their order details.
 - This replaces chaotic Instagram DMs with organized, context-rich WhatsApp conversations.
-

Slide 6: Next Steps & Feedback

Let's Launch Your Store!

We want to ensure you are 100% comfortable before pointing your Instagram followers to the new site.

Questions for You:

1. How many products are currently ready to list on the site?
2. How do you want to handle inventory sync initially?
3. What is your ideal timeline to go live and announce this to your followers?

Our Goal: To make your day-to-day operations smoother, giving you more time to source beautiful textiles and less time answering repetitive DMs!
